

Rosemount™ 248 Wireless Temperature Transmitter

- Standard temperature transmitter offers a wireless solution for process monitoring
- Optimize plant efficiency and increase measurement reliability with industry-proven capabilities and specifications
- Emerson Wireless delivers innovative wireless solutions for temperature measurement and overall transmitter performance
- Explore the benefits of Complete Point Solutions™ from Emerson.

Features and benefits

Standard temperature transmitter offers a cost effective solution for wireless process monitoring

- Single sensor capability with universal sensor inputs (RTD, T/C, mV, and ohms)
- IEC-approved *WirelessHART*® protocol
- Large LCD display

Optimize plant efficiency and increase measurement reliability with industry-proven capabilities and specifications

- One-year stability rating reduces maintenance costs
- User-centric device dashboards communicate important diagnostics and ensure process health
- Open/short sensor diagnostics assist with detecting issues in the sensor loop
- Compensation for ambient temperatures enhances transmitter performance
- Four user-configurable alerts provide increased process information and measurement point insight

Wireless delivers innovative wireless solutions for temperature measurement and overall transmitter performance

- Self-organizing network delivers information rich data with >99 percent data reliability and establishes a highly stable network
- Smart Wireless capabilities extend the full benefits of Plantweb™ to previously inaccessible temperature measurement locations
- Emerson SmartPower™ solutions provide an intrinsically safe Power Module, allowing field replacements without removing the transmitter from the process, keeping personnel safe and reducing maintenance costs
- Emerson’s layered approach to wireless network security ensures that data transmissions are secure

Explore the benefits of a complete point solution from Rosemount Temperature Measurement

- Emerson offers a selection of RTDs, thermocouples, and thermowells that bring superior durability and Rosemount reliability to temperature sensing, complementing the Rosemount Transmitter portfolio.

Experience global consistency and local support from numerous worldwide Rosemount Temperature manufacturing sites

- Experienced Instrumentation Consultants help select the right product for any temperature application and advise on best installation practices
- An extensive global network of Emerson service and support personnel can be on-site when and where they are needed
- World-class manufacturing provides globally consistent product from every factory and the capacity to fulfill the needs of any project, large or small

Access information when you need it with asset tags

Newly shipped devices include a unique QR code asset tag that enables you to access serialized information directly from the device. With this capability, you can:

- Access device drawings, diagrams, technical documentation, and troubleshooting information in your MyEmerson account
- Improve mean time to repair and maintain efficiency
- Ensure confidence that you have located the correct device
- Eliminate the time-consuming process of locating and transcribing nameplates to view asset information

Ordering information

The Rosemount 248 Wireless Temperature Transmitter has a rugged design and industry-proven capabilities and specifications.

Transmitter features include:

- IEC-approved *WirelessHART*[®] protocol (option code WA3)
- Large LCD display (option code M5)
- Internal antenna (option code WP5)
- 3-point calibration certificate (option code Q4)
- Assemble to Sensor options (option code XA)

WR5	5-year limited warranty	★

Specifications

Functional specifications

Input

Supports Thermocouple, RTD, millivolt, and ohm input types. See [Accuracy](#) for a full listing of sensor options.

Output

IEC 62591 (*WirelessHART*[®]) Compliant, 2.4 GHz

Local display

The optional five digit integral LCD display can display sensor temperature in engineering units (°F, °C, °R, K, Ω, and millivolts) and percent of range. The display updates based in the wireless update rate.

Humidity limits

0–99 percent non-condensing relative humidity

Update rate

WirelessHART[®], user-selectable one second to 60 minutes

Accuracy (Pt 100 at reference condition: 20 °C)

±0.81 °F (±0.45 °C)

Wireless radio

Frequency:	2,400–2,485 GHz
Channels:	15
Modulation:	IEEE 802.15.4 compliant

Physical specifications

Material selection

Emerson provides a variety of Rosemount product with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser's sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options and components for the particular application. Emerson is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

Conformance to specifications ($\pm 3\sigma$ [Sigma])

Technology leadership, advanced manufacturing techniques, and statistical process control ensure specification conformance to at least $\pm 3\sigma$.

Electrical connections

Power module

The Emerson SmartPower™ power module is field replaceable, featuring keyed connections that eliminate the risk of incorrect installation.

The power module is an Intrinsically Safe solution, containing Lithium-thionyl chloride with a polybutadiene terephthalate (PBT) enclosure.

The device has a power module life time rating of 10 years with a one minute update rate at reference conditions. Reference conditions are 70 °F (21 °C), and routing data for three additional network devices.

Note

Continuous exposure to ambient temperature limits –40 °F or 185 °F (–40 °C or 85 °C) may reduce specified life by less than 20 percent.

Sensor terminals

Sensor terminals permanently fixed to terminal block

Field Communicator connections

Communication terminals

HART® interface connections fixed to the power module

Materials of construction

Enclosure

Housing:	PBT/PC with NEMA® 4X and IP66/67
Cover O-ring:	Silicone
Conduit entry:	316 SST

Mounting

Transmitters may be attached directly to the sensor. Mounting brackets also permit remote mounting. See [Dimensional drawings](#).

Weight

Engineered polymer

Rosemount 248 Wireless without LCD display: 0.99 lb (0.45 kg)

Rosemount 248 Wireless with LCD display: 1.11 lb (0.51 kg)

Enclosure ratings

Type 4X and IP66/67

Performance specifications

Electromagnetic Compatibility (EMC)

Meets all industrial environment requirements of EN61326 and NAMUR NE-21. Maximum deviation < 1 percent span during EMC disturbances.

Transmitter measurement stability

±0.15 percent of output reading or 0.15 °C (whichever is greater) for 12 months

Self calibration

The analog-to-digital measurement circuitry automatically self-calibrates for each temperature update by comparing the dynamic measurement to extremely stable and accurate internal reference elements.

Vibration effect

The Rosemount 248 Wireless in direct mount configuration is tested to the following specifications with no effect on performance per IEC 60770-1, 1999:

Frequency	Acceleration
10–60 Hz	0.21 mm peak displacement
60–2000 Hz	3 g

The Rosemount 248 Wireless in remote mount configuration is tested to the following specifications with no effect on performance per IEC 60770-1, 1999:

Frequency	Acceleration
10–60 Hz	0.15 mm peak displacement
60–500 Hz	2 g

Sensor connections

Figure 2: Sensor Terminal Block

Figure 3: Sensor Connections

2-wire RTD and Ω

3-wire RTD and Ω

4-wire RTD and Ω

T/C and mV

Note

Emerson provides 4-wire sensors for all single element RTDs. Use these RTDs in 3- or 2-wire configurations by leaving the unneeded leads disconnected and insulated with electrical tape.

Temperature limits

Operating limit	Storage limit
-40 to 185 °F (-40 to 85 °C)	-40 to 185 °F (-40 to 85 °C)

(1) Change in ambient is with reference to the calibration temperature of the transmitter 68 °F (20 °C) from factory.

(2) Ambient temperature effect specification valid over minimum temperature span of 50 °F (28 °C).

Transmitters can be installed in locations where the ambient temperature is between -40 and 185 °F (-40 and 85 °C). In order to maintain excellent accuracy performance, each transmitter is individually characterized over this ambient temperature range at the factory.

Temperature effects example

When using a Pt 100 ($\alpha = 0.00385$) sensor input at 30 °C ambient temperature:

- Digital temperature effects: $0.009\text{ °C} \times (30 - 20) = 0.09\text{ °C}$
- Worst case error: Digital + Ambient temperature effects = $0.45\text{ °C} + 0.09\text{ °C} = 0.54\text{ °C}$
- Total probable error: $\sqrt{0.45^2 + 0.09^2} = 0.459\text{ °C}$

Product certifications

Rev 1.13

European Directive Information

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at [Emerson.com/Rosemount](https://www.emerson.com/Rosemount).

Ordinary Location Certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Telecommunication compliance

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification. Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

FCC and IC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation. This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

North America

The US National Electrical Code® (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

Certificate IECEx BAS 14.0158X

Standards IEC 60079-0: 2017; IEC 60079-11: 2011

Markings Ex ia IIC T4/T5 Ga; T4 ($-60\text{ °C} \leq T_a \leq +70\text{ °C}$); T5 ($-60\text{ °C} \leq T_a \leq +40\text{ °C}$)
See [Table 2](#) for entity parameters.

Special Condition for Safe Use (X)

1. The plastic enclosure may present a potential electrostatic ignition hazard and must not be rubbed or cleaned with a dry cloth.

Brazil

I2 Brazil Intrinsic Safety

Certificate UL-BR 15.0222X

Standards ABNT NBR IEC 60079-0: 2008 + Corrigendum 1:2011; ABNT NBR IEC 60079-11: 2009

Markings Ex ia IIC T4/T5 Ga; T4 ($-60\text{ °C} \leq T_a \leq +70\text{ °C}$); T5 ($-60\text{ °C} \leq T_a \leq +40\text{ °C}$)
See [Table 2](#) for entity parameters.

Special Condition for Safe Use (X)

The plastic enclosure may present a potential electrostatic ignition hazard and must not be rubbed or cleaned with a dry cloth.

China

I3 China Intrinsic Safety

Certificate GYJ20.1147X
Standards GB3836.1-2010, GB3836.4-2010, GB3836.20-2010
Markings Ex ia IIC T4/T5 Ga; T4 ($-60\text{ °C} \leq T_a \leq +70\text{ °C}$); T5 ($-60\text{ °C} \leq T_a \leq +40\text{ °C}$)
See [Table 2](#) for entity parameters.

Special Conditions for Safe Use (X)

1. Non-metallic parts incorporated in the enclosure of the product shall only be cleaned with a damp cloth to avoid electrostatic charge.
2. Must use Rosemount Model 701PGNKF SmartPower Green Power Module provided by the manufacture.

Japan

I4 Japan Intrinsic Safety

Certificate CML 20JPN2243X
Markings Ex ia IIC T4, T5 Ga ($-60\text{ °C} \sim +40/70\text{ °C}$)
See [Table 2](#) for entity parameters.

Special Conditions for Safe Use (X)

1. The plastic enclosure may present a potential electrostatic ignition hazard and must not be rubbed or cleaned with a dry cloth.
2. Power shall be provided only by a Model 701PGNKF SmartPower Green Power Module.

EAC

IM Technical Regulation Customs Union (EAC) Intrinsic Safety

Markings 0Ex ia IIC T5 Ga X; 0Ex ia IIC T4 Ga X; T5 ($-60\text{ °C} \leq T_a \leq +40\text{ °C}$), T4 ($-60\text{ °C} \leq T_a \leq +70\text{ °C}$); IP66/IP68

Specific Condition for Safe Use (X)

1. See certificate for special conditions.

Combinations

KQ Combination of I1, I5, and I6

Table 2: Entity Parameters

Voltage U_0	6.6 V
Current I_0	26.2 mA
Power P_0	42.6 mW
Capacitance C_0	11 μ F
Inductance L_0	25 mH

Dimensional drawings

Figure 4: Remote Mount

Dimensions are in inches (millimeters).

Figure 5: Direct Mount

Dimensions are in inches (millimeters).
